

backing having first and second opposing surfaces and pieces of material removably arranged on both of the first and second surfaces, the backing and the pieces of material being formed of substantially the same material;

applying at least one piece of material from the first surface of the backing to at least one object with said at least one applicator device; and

applying at least one piece of material from the second surface of the backing to at least one object with said at least one applicator device.

Please add the following new claim:

-- 76. (New) A method of applying pieces of material to objects, the method comprising:

providing a material supply strip and at least one applicator device capable of applying material from said supply strip to objects, said supply strip initially including a backing having first and second opposing surfaces and pieces of material removably arranged on both of the first and second surfaces, the pieces of material on the first surface having a different format than the pieces of material on the second surface, wherein the pieces of material on the first surface are positioned on the backing substantially opposite to corresponding pieces of material on the second surface such that outer edges of opposing pieces of material do not line up with one another;

applying at least one piece of material from the first surface of the backing to at least one object with said at least one applicator device; and

applying at least one piece of material from the second surface of the backing to at least one object with said at least one applicator device.--
